WHY CHOOSE US?

High Precision

Lebih presisi dalam hal dimensi, kelurusan sisi dan kesikuan pada keramik.

More precision in the dimension, straightness of sides and rectangularity.

High Water Resistance

Lebih tahan terhadap air sehingga dapat digunakan untuk ruangan tertutup dan terbuka.

More resistant to water so it can be used both indoors and outdoors.

High Pressure Durability

Keramik lebih kuat terhadap tekanan sehingga tidak mudah pecah.

Ceramic tiles are stronger against pressure so they are not easily broken.

Watermark-Free

Pelapisan *engobe* yang berkualitas menahan rembesan noda dari sisi belakang keramik.

The good quality engobe coating resists seepage of stains from the back of the ceramic.

Natural Random Design

Memiliki desain yang *random* sehingga tampak lebih natural menyerupai unsur-unsur alam.

It has a random design so that it looks more natural like natural elements.

HABITAT

KASAR ≠ KESAT

**Rough floor but
still slippery?**

**iGRIP IS YOUR
NEW SOLUTION**

Rumah adalah tempat teraman untuk Anda dan keluarga. Namun, pernahkah Anda membayangkan bahwa hal berbahaya yang paling sering terjadi di dalam rumah adalah terpeleset, terutama di ruang tamu, dapur, kamar mandi, teras atau garasi?

Yang dibutuhkan di area yang terkadang basah atau kering adalah sebuah keramik anti slip, dimana keramik tidak licin saat beraktivitas atau di saat area tersebut dalam keadaan basah. Karena semakin banyaknya pemilik rumah yang khawatir akan resiko terpeleset yang menyebabkan cedera parah, keramik Habitat hadir dengan fitur **iGrip** untuk keamanan ekstra dan ketenangan pikiran bagi keluarga Anda.

Home is the safest place for you and your family. However, have you ever imagined that the most dangerous thing that happens in the house is slipping, especially in the living room, kitchen, bathroom, terrace or garage?

What is needed in areas that are sometimes wet or dry is an anti-slip tile, which is not slippery during activities or when the area is wet. As more homeowners are concerned about the risk of slips causing severe injuries, Habitat tiles come with the iGrip feature for extra safety and peace of mind for your family.

HOW iGRIP WORKS?

Anti Slip

Telah lulus grade **R11**, permukaan keramik aman untuk digunakan di area yang sering terkena air ataupun tanjakan.

Passed R11 grade, the ceramic tile surface ensure safety for use in areas that are frequently exposed to water or inclines.

Scratch Resistant

Permukaan keramik menjadi lebih tahan goresan dan noda sehingga mempertahankan keindahan keramik lebih lama.

The ceramic tile surface becomes more resistant to scratches and stains, thus maintaining the beauty of ceramics longer.

Comfortable

Keramik kasar dapat membahayakan dan menggores kulit ketika terjatuh. Fitur iGrip memastikan permukaan yang halus tidak licin dan nyaman dipijak tanpa alas kaki.

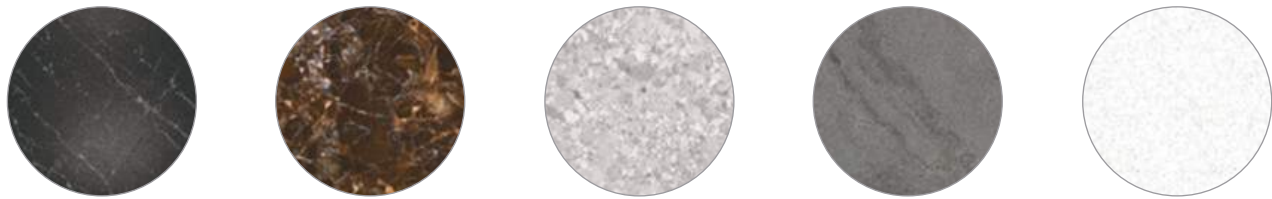

Rough ceramics can be dangerous and can scratch the skin when fall. The iGrip feature ensures that the smooth surface is non-slip and comfortable to walk on barefoot.

Multifunction

Menjadikan ruangan aman untuk anggota keluarga dan pengguna disabilitas. Proses perawatan keramik juga lebih mudah.

Making the room safe for family members and disabled users. The ceramic maintenance process is also easier.

Anti-Slip Tile

Ramp Testing for (R) Ratings
The most commonly understood method of testing the slip resistance of a tile is the ramp test which generates an R-Value ranging from R9 - R13. This method is used by all European tile manufacturers meaning that slip resistance information will always be available for you.

German National Standard Test Method

RATINGS & GRADES OF ANTI-SLIP TILES					
DIN51130	R9	R10	R11	R12	R13
Slip Angle	6-10 deg	10-19 deg	19-27 deg	27-35 deg	35 deg
Wet Slip Risk	High Risk	Moderate	Moderate	Low Risk	Low Risk
Suitable For	Dry Areas	Areas kept mostly dry	Can be occasionally wet	Commercial wet areas	Very wet commercial areas

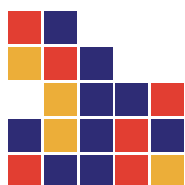

TILES INSTALLATION

TILE SPACER

Penggunaan *tile spacer* membantu menjaga jarak antar susunan keramik sama besar dan konsisten.

TILE SPACER - The uses of tile spacer will help to maintain the same consistent space between tiles.

LEBAR NAT

Lebar nat yang dianjurkan adalah 2 mm untuk keramik *cutting*, 3-5 mm untuk keramik *non-cutting*.

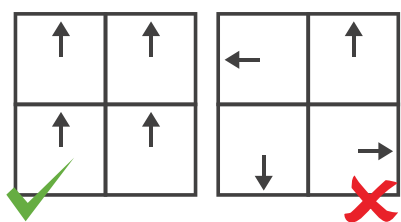

GROUT WIDTH - Leave a 2 mm gap between rectified tiles and a 3-5 mm gap between non-rectified ones.

DESAIN & MOTIF ACAK

Setiap kemasan berisi desain/motif acak untuk memberikan kesan yang lebih natural.

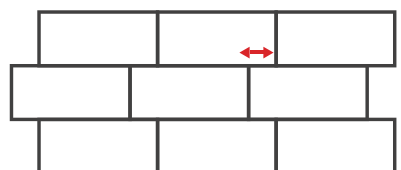

RANDOM DESIGNS AND MOTIVES - Random designs or motives in each box give natural impression visually.

ARAH PANAH

Pasanglah keramik searah dengan panah di balik keramik. Pastikan semua menunjuk pada arah yang sama.

ARROW DIRECTION - Install the tiles according to line guidance as shown on the back of each tile. Make sure all the tiles are in the same arrow direction.

SUSUNAN KERAMIK

Hindari pemasangan keramik susun bata. Beri jarak maksimal 20% dari sisi keramik.

TILE ARRANGEMENT - Brick-stacking pattern is not preferable. Simply give a maximum space 20-percent of the edge of tile.

TILES MAINTENANCE

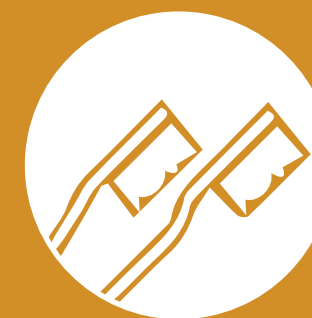

Sapu keramik dari debu dan kotoran sebelum di pel.

Sweep the ceramic from dust and dirt before mopping.

Gunakan sabun khusus pembersih lantai keramik.

Use a special soap to clean ceramic floors.

Gunakan sikat halus atau sikat gigi untuk menyikat noda membandel dan segera bilas dengan air hangat.

Use a soft brush or toothbrush to brush off stubborn stains and rinse immediately with warm water.

Jangan gunakan larutan kimia asam yang bersifat korosif.

Do not use solutions containing corrosive acidic chemicals.

Cairan kimia asam yang bersifat korosif dapat merusak permukaan keramik secara permanen!

Corrosive acidic chemicals may damage the surface of ceramic permanently!
